FARMERS NEED SCIENTIFIC AID

Discussion on Butter Making at
Grange Meeting Discloses
Faults in Business.

More scientific methods in the making of dairy butter among the farmers of St. Joseph county was the general belief expressed at the meeting of the St. Joseph Valley Grange No. 584, at the regular weekly session held Thursday afternoon. The discussion of the afternoon had to do with the relative value of Dairy and Creamery butter. This discussion was led by R. W. Donmoyer. Other speakers were Thomas J. Kryder, Virgilus Nisear, Edward Vogt and Mrs. Edward Vogt.

It was admitted throughout the discussion that creamery butter is better and worth more than dairy butter but this difference in value was held to be due entirely to negligence and ignorance on the part of the farmer. It was agreed that the farmers were in need of organization by means of which they might hire an expert to test their milk and thus keep the small herds free from unprofitable animals. With the aid of expert inspection the farm dairy could be started on the road to money making and the farmer's wife be encouraged to make a better grade of butter.

Demand Is Large.
The discussion brought out the opinion that the demand for country butter among city people was large and that it could readily be sold for a price more nearly equivalent to that paid for creamery butter if more care were exercised in making it. It was pointed out, for instance, that creamery butter was worth the usual price of five or 10 cents more than dairy butter for the reason that a pound of creamery butter would go farther than a pound of dairy butter. This, it was agreed, was due to the fact that more scientific methods were employed in "working" creamery butter and, as a result, such butter was more solid and contained less water than dairy butter.

Attention was called by the speakers to the fact that the price of creamery butter was regulated by the Elgin Butter board while the price of dairy butter was regulated by the grocer. The price of dairy butter, it was maintained, could be made more stable by improving the quality and thus securing a more steady demand.

It was decided at the business session that a play and a dinner should be given on Thanksgiving day. There will be 30 characters in the play. On Dec. 9 the next all-day meeting will be held under the auspices of the Pomona grange.

ASKS "WHERE ART THOU?"

Rev. Black Discusses Various Classes
of Christians at Revival.

"Where Art Thou?" was the question discussed by Rev. Guy Black of the Lowell Heights M. E. church at the fourth meeting of "Win-My-Chum" week, held Thursday night at Trinity M. E. church.

Rev. Black applied the question, "where art thou?" to four classes of people; to the faithful Christians, who are able to answer the question creditably; to the half Christians, who are trying to serve both sides, and in so doing slight the right for the wrong; to those who refuse to consider the question; and to those who realize that they are not living the right kind of life, and who want to do better.
